Replacing an Empty Bobbin

1. Tighten bobbin halves securely.
2. With latch raised, slip bobbin (wide side up) into bobbin case.
3. Snap latch down to secure bobbin.
4. Leave the slide plate open until you have finished winding.

Inserting a Previously Wound Bobbin

*Make sure needle is in its highest position.*

1. Open slide plate; leave bobbin push button in sewing position.
2. Draw three or four inches of thread from bobbin and place bobbin in case with thread leading off to left side of latch.
3. Snap latch down to secure bobbin.
4. Close slide plate, allowing the thread to enter the notch in the slide plate. (For instructions on starting to sew with a previously wound bobbin, see page 22.)
