Ending a Seam
1. Stitch to the edge of the fabric.
2. Raise stitch length selector and backstitch to reinforce end of seam.
3. With take-up lever at highest point, raise presser foot and remove fabric by drawing it to the back.

CURVED SEAMS
Follow the same steps as for straight seams except:
1. Use a short stitch length for elasticity and strength. For example, if you use 12 stitches per inch for straight seams, select 15 to 20 per inch to stitch curved seams in the same fabric.
2. Use the straight stitch foot for greatest accuracy.
3. If you use the seam and hem guide, attach it at an angle so that the edge that is closer to the needle acts as a guide.
